S.W. Basics

Makeup removers go onto some of the most sensitive skin on your whole body. So we kept ours as simple as possible (don't we always?): some super-light, organic sweet almond oil, a bit of organic extra-virgin olive oil, and a little jojoba oil. Shake it up and put it on with a cotton ball to get off all that gunk without any burning eyes or greasy residue. And it doubles as an awesome light moisturizer, so go a little nuts with it. swbasicsofbk.com
