

RENO, Nev. (March 3, 2020) — NCET, Nevada’s Center for Entrepreneurship and Technology, announced today Davidson’s Organics as the 2020 Food Manufacture / Processing company of the Year. Davidson’s Organics recognition in this category symbolizes innovation and standard setting within manufacturing and processing of wholesale goods.

In 2019, Davidson’s doubled in size; moving from a 20,000 sq foot warehouse to a 50,000 sq foot warehouse along with doubling their staff size. Also within this time, Davidson’s acquired an SQF certification. The rigorous certification officially recognizes Davidson’s as having the highest possible global food safety standards. The SQF certification will allow Davidson’s to better meet the needs of its customers and by guaranteeing that all aspects of sourcing and manufacturing teas is in good hands, so that customers can focus more on branding, sales and marketing. Davidson’s is also a leading company in product innovation with 12 new releases in 2019 and several new blends in the queue for 2020, being able to do that by investing in two new pyramid teabag machines costing \$210,000, which allows for whole leaf tea infusion in the convenience of a teabag.

Now in its 13th year, the NCET Technology Awards celebrate the Northern Nevada individuals and companies who have greatly enhanced the growth and prestige of the technology community, while the EDawn Awards recognize the people and resources that have played an integral part in contributing to the growth of our community.

About NCET:

Nevada’s Center for Entrepreneurship and Technology, Northern Nevada’s largest educational and networking organization, is a member-supported nonprofit organization that produces educational and networking events to help people explore business and technology. NCET’s award-winning programs include the annual NCET Small Business Expo and NCET Tech Showcase and Awards, the monthly Biz Bite and Special Event luncheons and the monthly Tech Wednesday and Biz Café events. NCET is funded by memberships, sponsorships and program revenues, and receives no state or Federal funding. NCET is not affiliated with the State of Nevada nor the University of Nevada.
